GIS Intern

The GIS Intern position will greatly assist the Information Services department in fulfilling the data and mapping requests of other departments within Bartow County.

The GIS Intern position will be responsible for assisting with the compilation of a targeted sidewalk inventory and analysis using GIS tools and available aerial photography. The inventory will be used to assess and prioritize critical linkage improvements within targeted areas in the community that have been determined to have a higher demand for pedestrian access such as local medical, government, shopping and education centers.

The GIS Intern will operate a computer-based enterprise ArcGIS mapping system as well as ArcGIS Online to enter, edit, manage, analyze, report and display information. The GIS Intern will perform data entry through on-screen digitization, keyboard data entry, scanning, field data collection and other methods. Candidates must have experience with Esri ArcGIS 10.2 or higher software as well as the ability to work both independently and in a team environment. Candidates will be expected to perform field work, involving walking along sidewalks.

The internship runs May 1, 2017 – September 1, 2017 and the intern will work up to 200 hours. The salary is $10/hour. All work will be completed at the Bartow County GIS offices located in Cartersville, GA. Regular attendance is required; telecommuting is not possible for this position.

This internship is funded through the Georgia County Internships Program (GCIP). Therefore, applicants must be currently enrolled in college as undergraduate or graduate students, or have recently graduated from college within 6 months of the grant period. High school students and persons who graduated more than 6 months ago are not eligible.

Interested applicants should submit a resume by April 10, 2017, to the following:

Bridget Lawlor, GIS Coordinator
